

# TMM Inflatable Tent

**Our TMM tents are designed to provide large working and storage spaces in very little time.**

Our TMM tents are composed of a pneumatic structure and a covering sheet made of PVC coated polyester fabric.

The tent consists of several modules (front, rear and central), which can be connected together to form a single structure.

It offers a basic surface of 105 m<sup>2</sup> that, depending on your logistical needs, can be increased by adding central modules of 35 m<sup>2</sup>, thus allowing to put a truck inside, for example.

Resistant, robust and compatible with a wide range of accessories, our TMM NG tents can be used effectively on all types of terrain.

Their transport is facilitated by the small size modules which, once packed, do not exceed 1 m<sup>3</sup>.

Highly compatible, they can be connected to other tents (even smaller dimensions) in all directions. All materials used have a high mechanical strength and are fire-retardant.

Technical support is carried out by our engineers and technicians all over the world.

#### Available accessories:

- Automatic pressure maintenance system
- Internal wall partitions
- Internal insulation liner
- Sunscreen
- Electric inflator
- Protective groundsheet
- Lighting
- Power distribution box
- Heating and air conditioning
- Floor levelling tiles
- Connection module between tents.
- Entrance module
- Connexion between tent and vehicles
- Printed logos

#### Load resistance:

- Wind : 100 km/h.
- Snow : 15 daN/m<sup>2</sup>

#### Colours:

- White
- NATO Green
- Sand
- Camouflage
